

## Erosion Control Coordinator Training

YUMA, AZ

Yuma DPS Region Facility  
Training Room  
2111 E. Gila Ridge Road  
Yuma, AZ 85365

7:00 am – 4:00 pm daily

Attention:

AGC Members

ADOT

Municipalities

Consulting Engineers

This comprehensive 16-hour training class objective is to give the participant a knowledge base on storm water pollution, regulations and best management practices (BMPs). The course will include potential storm water pollution sources and effects associated with construction activity.

The appropriate methods of erosion and sedimentation control will be presented as well as use of BMPs to control erosion and sedimentation pollutants discharged into waterways. Post construction BMPs, inspection techniques and a checklist for inspections will be reviewed. The class will conduct a mock inspection exercise and fill out the inspection forms using photo images to represent field conditions. Maintenance of the BMPs along with a section on storm water monitoring for construction sites within a ¼ mile of a unique / impaired waterway will also be presented.

The ADOT guidance manual for Erosion Pollution and Control will be used along with course handouts.

Certificates will be issued at the end of the class. These certificates along with your experience must be submitted to ADOT and approved in order to be listed as the Erosion Control Coordinator on the project.

**This course will fulfill the 16 hour training requirement listed in ADOT Specification 104.09 SWDEQ and 104.09 SWEPA.**

## REGISTRATION FORM

Registration Fee: \$300.00 per person. The fee includes course materials, refreshments and lunch daily. It does not include hotel reservations or transportation to attend the class.

## Erosion Control Coordinator

### Daily Schedule

Registration 7:00 am – 7:30 am

Continental Breakfast 7:00 am – 7:30 am

Introductions & Welcome 7:30 am

#### Day 1.

Storm Water Regulations, Pollution Sources and Effects, Fines  
ADOT Erosion Pollution Control Manual  
Temporary Soil Stabilization and Sediment Control  
Guidance for Implementation of other BMPs, BMPs Inspection  
Temporary Soil Stabilization BMPs  
Temporary Sediment Control BMPs  
Wind Erosion BMPs, Tracking Control BMPs  
Non-Storm Water Management BMPs  
Waste Management and Materials Pollution Control BMPs  
Post Construction BMPs  
Inspection Techniques, Mock Inspection Exercise and  
BMP Maintenance

#### Day 2.

7:30 am  
Regulations and Permit Review  
Roles and Responsibilities for ADOT and Contractor  
SWPPP Preparation materials  
Water Pollution Control Strategies Review  
Preparing a SWPPP, Approval of SWPPP,  
SWPPP Certification and Approval, SWPPP Amendments  
Introduction and Project Description, References  
Body of SWPPP (Objectives, pollutant source identification, BMP  
selection/BMP Checklist and BMP Requirement Exercise, BMP  
text description, Maintenance and Inspection Repair)  
Storm water Monitoring and reports  
Responsibilities during Construction and for Completion  
Inspections, Final Erosion Control and Recordkeeping
