

Requirements to Attend Erosion Control Coordinator Certification Training

According to ADOT specifications 104.09 SWDEQ and 104.09 SWEPA any individual listed as the erosion control coordinator for a construction project must have the following qualifications.

- Successfully completed the two day (16 hours) Erosion Control Coordinator training class provided by the Arizona Chapter AGC and ADOT
- Documented experience equal to a minimum of one year from either of the following two categories:

Experience in the development and implementation of Storm Water Pollution Prevention Plans (SWPPP) as specified in the AZPDES general permit or NPDES for highway construction projects. The proposed erosion control coordinator's experience shall demonstrate full time responsibility for directly supervising construction personnel in the installation, monitoring and maintenance of erosion control items.

Experience in re-vegetation or restoration of disturbed areas in environments similar to those on the project. Experience in temporary or permanent stabilization of disturbed areas will also be considered. The proposed erosion control coordinator's experience shall demonstrate full-time responsibility for directly supervising personnel in temporary or permanent re-vegetation or restoration of disturbed areas.

Additional Requirements for Sensitive Projects

Projects deemed sensitive by ADOT Roadside Development section, add the following: The erosion control coordinator shall also meet one of the following requirements:

Registration in the state of Arizona as a Landscape Architect, with a minimum of one year experience in the fields of erosion and sediment control .

Registration in the state of Arizona as a Professional Engineer with a minimum of one year of experience in the fields of erosion and sediment control.

Certification by the International Erosion Control Association (ICEA) as a Certified Professional in Erosion and Sediment Control.
