

DIRT ROADS WORKSHOP

**TUESDAY, SEPTEMBER 20, 2022
9:00 AM TO 12:00 PM**

Virtual

Workshop on planning, designing, constructing, and maintaining dirt roads. Intended for planners, senior equipment operators, supervisors, engineers, procurement officials, managers, and executives. Participants will receive information on what treatment strategies are the best in what conditions. Information will be provided on how to improve drainage, improving dirt roads, considerations for stabilization, methods of stabilization, use of chemical products, experience with stabilization, recommended practices, and maintenance strategies. Also includes information on graveling, chip sealing, and paving dirt roads.
